

Colourful Creations in Photoshop

Open an image in photoshop

In the layers pallet make a new layer above the image

Then fill the layer with a colour

Edit: Fill

Contents: colour

Blending: Normal 100%

OK

Then in the layers pallet, select the blending mode: Difference

You should have a colourful creation

You can then select: Image: Adjustments: Hue and saturation

By moving the sliders, in the hue and saturation box, you can change and control the effect.
